

# Before You Buy Worksheet

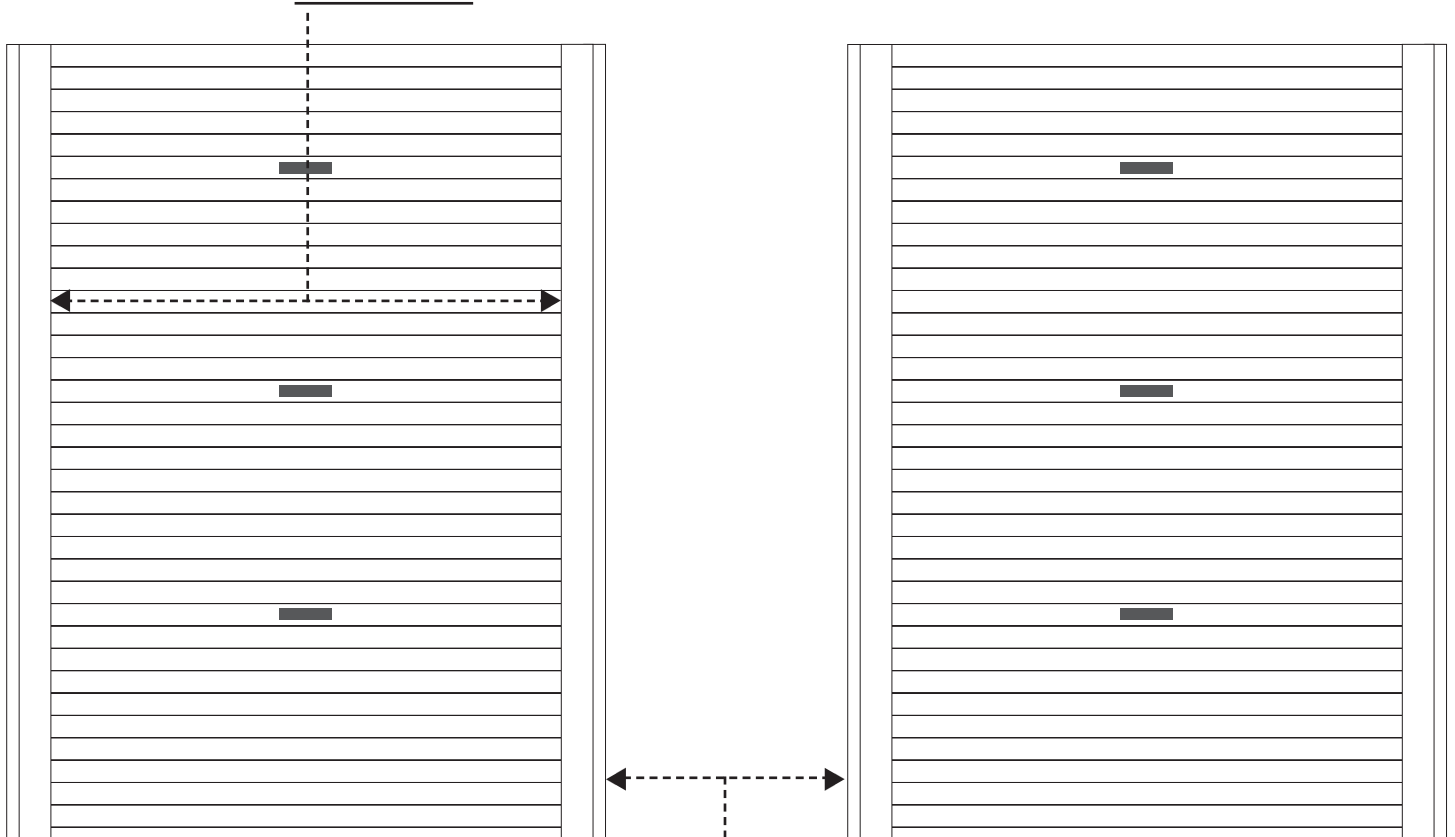

To determine the best solution for your loading dock, you will need to know the size of your dock door and the amount of space between multiple dock doors if you are in need of more than one solution. Use the diagram below to record your information.

## Location Specific Guidelines

- Bollards cannot be installed on dirt or wood.
- Wall mounts cannot be installed on dry wall.
- If you need multiple gates, you must have ***at least 28 inches*** of wall space for the ultimate defender gate and ***at least 24 inches*** of wall space for the defender and standard gates. The bases cannot overlap.

1. Measure your dock door to determine its size.

Dock door size: \_\_\_\_\_ (ft.)

2. Measure the space between dock doors. -----

Space between doors: \_\_\_\_\_ inches
