CUSTOM NETTING & INDUSTRIAL PRODUCTS

Piece explanation (counts will vary per size).

Brackets

Large & Small Snap Hooks

Wire Rope

Wire Rope Clips

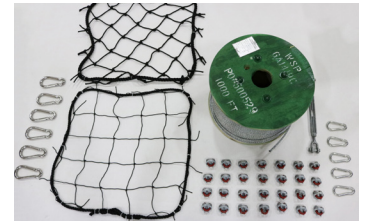

Turnbuckles

Drill Bit

Rope Border Safety Net

Kit Contents

Assembly

Steps 1 & 2

Step 3

Step 4

Steps 5-8

1. Place bracket in desired coverage point and use single bolt to fasten bracket to upright.
2. Drill Secondary hole for complete securement on each bracket.
3. Create a loop with wire rope and clips on one end and weave through center brackets to get to opposite end.
4. Once the wire rope is at the opposite end fasten a turnbuckle and snap hook combination to the end of wire rope and fasten to the bracket.
5. Repeat this process in the middle and top horizontal lines.
6. Run vertical wire rope lines from top (loop and wire rope clips) to bottom and secure a turnbuckle at the bottom.
7. Repeat this process for each upright.
8. Now that you have the entire outline and frame, fasten the net to the frame with snap hooks all the way around the perimeter every 2 feet (24 in).
9. Use nylon ties to fasten the loose net to the bottom of the frame. *(optional)*
10. Use turnbuckles to adjust tension if needed.
